

FOTON TUNLAND

Engine model	ISF2.8
Type	In-line four-cylinder, electronically controlled, high pressure common rail
Displacement (L)	2.776
Power rating (speed) [kw(r/min)]	120(3600)
Maximum torque (speed) [N.m(r/min)]	360(1800-3000)

Strong power - One of highest power-per-liter light duty diesel engines

- With a strong power of 120KW and a power per liter up to 42.9kw, it has the highest power among the engines with displacements below 3.0L at present; in addition, the maximum towing capacity of the vehicle also reaches 2.5T.
- The engine has a maximum torque output of 360N.m which is 22.5%-60% higher than those of similar products. At the same time, with a maximum torque output speed up to 1,200r/min, the vehicle can handle various harsh road conditions easily.

<p>Cummins engine</p>	<p>BorgWarner (U.S.A.) transfer case (For 4WD models only)</p>	<p>Getrag (Germany) gearbox</p>	<p>Dana (U.S.A.) rear axle</p>
